

Laptop Lock-Up® / E-Tool Cabinet Specifications

Laptop Lock-up® cabinet provides secure storage, battery charging, and communications for laptops, notebooks, tablets, handhelds, and e-tools.

Laptop Lock-up cabinets provide safe storage, charging, and communication solutions for maintenance technicians throughout the United States. Each mobile field worker is assigned an individually keyed drawer in which to store their notebook. Each drawer has the capability to charge the laptop battery and connect the laptop to a LAN or WLAN through communication connections.

This capability is provided by a patented, coiled, CAT 5 wiring system. In addition, there are options to include an Ethernet switch and a KVM switch, both of which are backed up by a UPS.

Functions:

- To easily secure laptop, notebooks, tablets, PDAs, and hand-helds, recharge batteries, and download/upload data
- For storage of test equipment

Features:

- No installation necessary; simply remove from carton, connect to main power supply located on back of cabinet, and connect data line to switch. Laptop storage cabinet is then ready to securely store laptop computers or test equipment with the capability to recharge and/or download data while the notebook is secured in the drawer
- Patented power supply system; power to each drawer by a UL approved coiled cord with 3 prong grounded outlet
- Cat 5 Data connection to each drawer is by a patented coiled cord system with RJ45 jack
- Locking rear door allows easy access to internal components of the notebook cabinet
- Each drawer has a cam lock all keyed differently with 2 master keys per notebook security cabinet
- Drawers and storage cabinet vented on bottom and sides
- Highly durable textured powder coat paint in Black and Stealth Blue (other colors available)
- Mounting bracket to attach security cabinet to floor or wall.
- Also available in 2, 3, or 5 drawer models
