

LAPTOP LOCK-UP®

STORAGE SYSTEM

OPERATING INSTRUCTIONS

- 1) Remove cabinet from carton and remove all packing material.
- 2) Master Keys are attached to the cabinet.
- 3) Individual keys are located inside each drawer.
- 4) Unlock all drawers using the master key.
- 5) Move cabinet to desired location.
- 6) Adjust stand height (5 drawer model, if desired) by following directions below.
- 7) Level cabinet with the levelers located on each leg.
- 8) Plug power strip into wall outlet.
- 9) Plug data communication lines into “jack” or Ethernet switch on the back of the cabinet (if desired).

The Laptop Lock-up® is now ready for use. Individual laptop computers can now be recharged while securely locked in the drawers. Data communication with the laptop computers can also be accomplished while they are stored (if desired).
